

For Every Collaboration Challenge, There's CAM

Navigating the Digital Collaboration Challenge

In a digital age, efficient collaboration isn't just about being connected; it's about being secure, organized, and ahead of the curve.

Organizations, especially within the legal sector, face a myriad of challenges — from the chaos of scattered data, the danger of unrestricted access, to the risk of non-compliance due to data lingering beyond its intended lifecycle.

Beyond just ensuring collaboration efficiency, it's crucial to drastically reduce the time spent sifting through information, thereby saving resources and speeding up decision-making processes. There's also the need to fortify data security, keep unauthorized access in check, and remain compliant in a constantly shifting regulatory environment.

It's not just about working together; it's about working smarter, working more safely, and more efficiently.

Introducing Litera's CAM
—your trusted partner
in navigating this intricate
digital maze.

CAM: Your Digital Collaboration Maestro

CAM isn't merely a SaaS platform for provisioning and governance of systems. It is the link between efficient collaboration and reliable security. Specifically tailored to combat issues such as data sprawl, inconsistent access controls, and governance blind spots, whether you're using iManage, NetDocuments, Microsoft 365, or File Shares, CAM bridges the chasm.

Dive Deeper: Understanding the CAM Tiers

With Litera's CAM, flexibility meets functionality. Depending on your specific needs and objectives, it offers a flexible range of licensing options. Here's a closer look at each of the CAM tiers and the unique issues they tackle.

PROVISION: The Start of Efficiency

Crafting Workspaces, Helping Ensure Security.

In a world driven by rapid decisions, getting the right start is paramount. CAM's PROVISION tier ensures your projects are not delayed by convoluted setup processes or misalignment in tools and systems, ultimately providing the following benefits:

- ✓ Boost your team's productivity with easy setup processes
- ✓ Create workspaces that match your firm's unique needs
- ✓ Fortify your client data with controlled access management

MANAGE: Orchestrating Digital Harmony

Centralize. Support. Expand.

As your organization scales, managing the plethora of digital assets without a central system can be chaotic. CAM's MANAGE tier provides a unified directory ensuring order amidst this growth, offering:

- ✓ Permit administrative activities without the requiring administrative access to the DMS
- ✓ Optimize data management with PowerDesktop license

MOVE: Facilitating Fluid Transitions at Every Step

Moving Data, Not Disrupting Work.

Movement of data within or between systems shouldn't equate to business disruptions. With CAM's MOVE tier, your organization sidesteps the pitfalls of data movement, ensuring no data loss, system downtimes, or versioning errors, while also experiencing the following benefits:

- ✓ Keep your firm's operations running smoothly with seamless data mobility
- ✓ Encourage collaboration with easy content transfer across workspaces and systems

CAM

ANALYZE: Unveiling Insights, Empowering Decisions

Turning Data into Narratives.

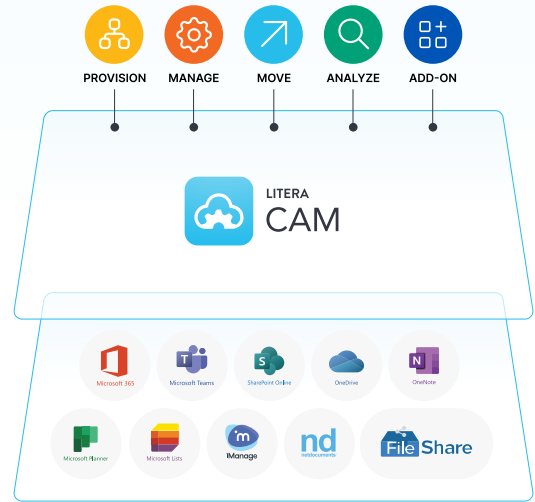

Amidst the overwhelming data influx, how do you discern actionable insights from mere noise? CAM's ANALYZE tier sifts through this sea of data, spotlighting what truly matters giving you the full picture of your matters when you need it most, and offering the following value:

- ✓ Leverage data insights to drive success
- ✓ Action on data derived from multiple data sources in a flexible graphical interface
- ✓ Track key metrics with easy-to-use dashboards
- ✓ Get a bird's eye view of all workspace activities for swift decisions

CAM: Your Partner in Seamless Collaboration

CAM is THE MISSING LAYER to modern legal collaboration. It allows organizations to adapt their tools to the unique project and client lifecycles in their business. This creates a more efficient and secure environment for teamwork to happen, simplifying provisioning, managing, moving, analyzing, protecting, and maintaining compliance of data across multiple collaboration systems, ultimately mitigating privacy and cybersecurity risks.
