

Migrate DMS Systems and File Shares to iManage Cloud or On Premises

Consolidate and Migrate in One Step

Prosperoware Cloud Migrator accelerates and vastly improves the process of moving content from on-premises DMS systems and File Shares to iManage Cloud or on-premises.

Cloud Migrator was designed to tackle two of the biggest migration challenges: (1) Migrating data without impacting existing systems; and (2) Enabling pre-migration data clean-ups without complex scripting.

Key Features

- Standardized ETL ("Extract, Transform, Load") approach to migration
- Move legacy folders and flat space documents
- Clean-up documents from flat spaces into workspaces and folders
- Out-of-the-box conversion scripts for iManage
- Custom scripting abilities for eDocs, File Shares, and other systems
- Move on-premises iManage databases to iManage cloud
- Clean-up and modify data before moving – via staging tables
- Optional and selective document history move

•	Option to map, modify, and migrate existing metadata
	fields via provider's REST API

- Automatic creation of users, groups, group memberships, and metadata
- Move 'My Matters' and 'My Favorites'
- Full delta synchronization and processing
- Unattended run mode
- Support for multiple threads, parallel processing
- Retry and Audit log

Common Data Clean-Up Problems

- Missing/orphaned document classes on folders
- Duplicate email addresses on folders
 - Missing users in document history
 - Documents in the flat space
- 🗹 Legacy folders
- Remove former users from ACLS

"The ability to merge two databases and move flat space files into workspaces significantly reduces cloud migration costs"

Migrate DMS Systems and File Shares to iManage Cloud or On Premises

Consolidate and Migrate in One Step

Prosperoware Cloud Migrator delivers a powerful and efficient solution for content migration. Its multithreaded, industry standard ETL design offers the fastest and most efficient method for consolidating databases, mapping metadata, and directly migrating content to iManage Cloud from eDocs, iManage (on-premises), Windows File Shares, or virtually any other structured database system. It has been designed for scale - handling simple, or even the most complex migration projects.

Key Benefits

- Ability to clean-up, fix, and remap data as it's migrated
- Fastest performance possible (limited only by your hardware provider and ISP) for moving content to iManage
- Out-of-the-box migration

 no complicated scripting
- Reduced cost and quicker "go live"
- Accelerated migration from iManage, eDocs, Windows File Shares, and virtually any other structured database system
- Reduce the complexity of any cloud migration project
