

Foundation Insights Deal Point Designer: Custom Deal Points For Your Firm

With Litera's groundbreaking GenAl solution, Foundation Insights, any firm can create an easily searchable deal point database and gain insights into complex deals. With **Foundation Insights Deal Point Designer**, firms can customize their own deal points and create their own document templates, giving you maximum flexibility to get the information your firm needs.

Client-Centered

Create client-specific deal points, like preferred liability caps or ESG clauses, to quickly access tailored precedents, deliver precise advice, and respond faster with up-to-date client-focused data.

Simplicity

Effortlessly create, search, and compare deal points in seconds with an intuitive tool that simplifies your work, delivering precise, customized answers so you can focus on what you do best.

Niche Deal Points

Firms can create niche deal points specific to their specialized expertise and ensure the firm's proprietary knowledge is accurately captured in Foundation Insights, enhancing service quality and maintaining a competitive edge.

Accelerated Time to Value

Firms can respond in real-time to independently create deal points without Foundation Insights support, increasing time to value and allowing for immediate market adaptation.

Enhanced Relevance

Improve the relevance of your data to align with your firm's specific use cases and document types to provide more precise insights and better decision-making.

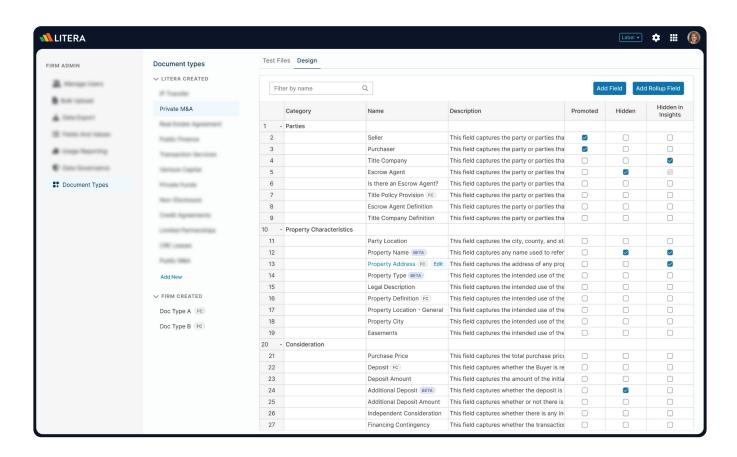

International Law Firms

Firms operating across multiple jurisdictions can customize deal points to align with requirements of different countries, increasing relevance and accuracy of your data and ensuring compliance.

Maximize the effectiveness of your deal data with the flexibility of Foundation Insights Deal Point Designer: Customizable deal points and document templates that meet your firm's needs.
