

End-to-End Governance. From Provisioning to Disposition

*Law firm data grows
by 40–50% annually,
with unstructured data
comprising 80–90%.*

CAM helps law firms manage access to sensitive content with confidence. From client workspaces to internal files, CAM provisions and secures your DMS ensuring the right people access the right content at the right time.

With CAM:

- Automate user provisioning and permissions across matters and workspaces
- Enforce naming conventions and workspace templates to improve consistency
- Reduce manual effort with Service Desk to complete bulk security and metadata updates, check-ins, and more
- Make secure, efficient document management a standard—not a struggle

FileTrail gives law firms full control over their records—both physical and digital—at every stage of the lifecycle ensuring information is secure, trackable, and compliant. Easily manage retention and disposition of records to effortlessly align with policies.

With FileTrail:

- Quickly locate records—see who requested them, where they are, and when they're needed
- Apply and manage retention schedules with confidence
- Enforce legal holds and security protocols to meet regulatory and client-driven requirements.
- Standardize records workflows across offices and departments

Complete your governance ecosystem with:

70% of legal plan to invest in data management and information governance in the next two years.

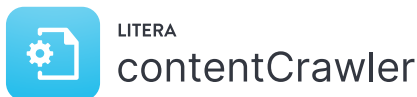

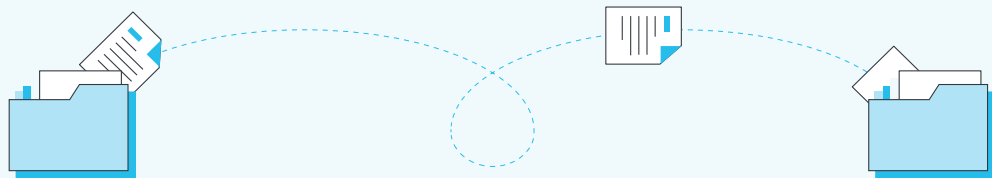

PowerDesktop is an intuitive and user-friendly hybrid desktop client designed to tackle data transfer challenges with ease. It enables users to efficiently bulk import, export, and map documents while eliminating duplicates and minimizing transfer errors.

Streamline your data transfers and enhance productivity with PowerDesktop.

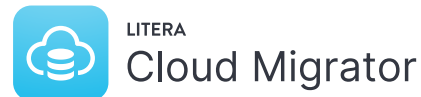

Matter Mobility automates the transfer of client and matter data between systems and users—safely, seamlessly, and at scale. It minimizes risk and manual work while improving consistency and compliance with guided workflows and conflict checks built in.

Centralize and secure matter movement to keep client work moving.

Bulk Document Scanning
contentCrawler ensures documents are accessible, enhancing productivity and compliance

Migrate and Consolidate Content
Migrate on-premises DMS and file shares to iManage Cloud or Work 10.
