LITERA
Kira

Trusted Contract Intelligence Powered by Hybrid AI

In contract review, "close enough" isn't good enough. Your reputation and client relationships depend on catching every critical provision and mitigating human error.

Kira is the #1 AI-powered contract intelligence solution, combining advanced GenAI with proprietary AI trained on over a million contracts. Trusted by 70% of the top 50 global law firms, Kira delivers accuracy, flexible governance, and collaborative workflows for high-volume review.

Why Kira?

Manual large-scale reviews are slow, error-prone, and costly. Junior lawyers often spend an hour per document, while generic GenAI tools fail to capture critical nuances. Relying on pure GenAI tools demands prompt engineering expertise, creating risk and demanding lawyers spend valuable time crafting effective prompts and manually reviewing gaps left by these tools.

Kira changes the game. It helps law firms and legal departments cut review time by up to 50%, reduce risk with confidence, scale without compromise, and stay compliant with governance requirements. The result? Solid risk mitigation, better client service and more time for higher-value work, enabling growth opportunities powered by technology that will scale with you.

⚡ Over 90% Accuracy

Achieve unparalleled accuracy with hybrid AI, combining GenAI + proprietary AI for reliable extractions and actionable insights.

⚖ Legal-Specific Collaboration & Scalability

Leverage end-to-end workflows built for lawyers, by lawyers. Start in Lito, your AI Legal Agent for everyday tasks in Word, Outlook, and Web, and continue in Kira for large-scale reviews.

🌐 Flexible AI Enablement

Toggle GenAI on/off to meet governance, security, and compliance needs without sacrificing speed or quality.
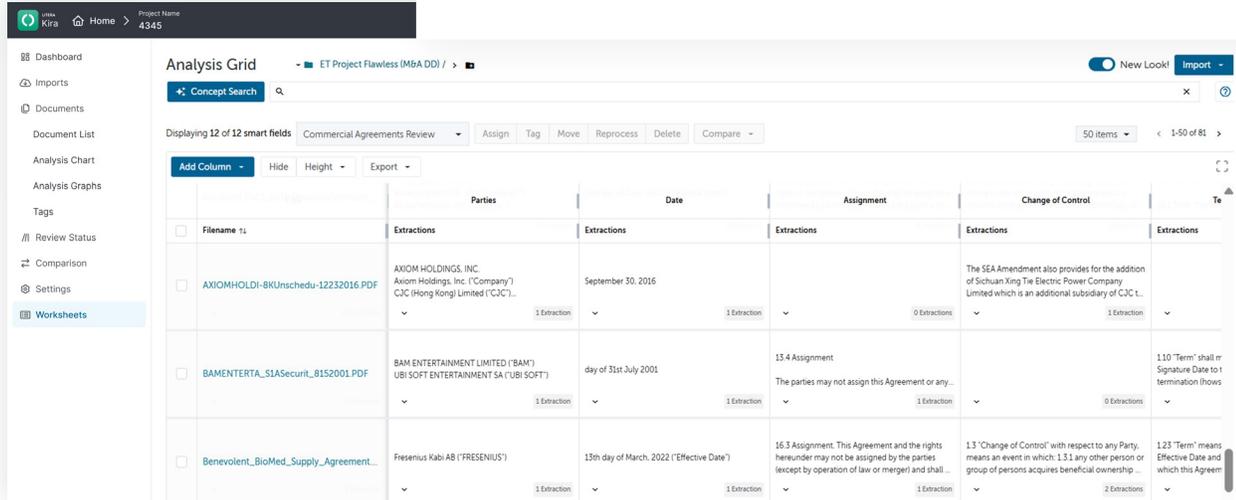

📄 One Tech Partner, One Platform, One AI Agent

Leverage Kira together with Litera's complete ecosystem – drafting, transaction, knowledge management - to automate every step of a deal.

LITERA
Kira

Key Use Cases

- Buy-Side and Sell-Side Diligence
- Banking & Finance
- Real Estate
- OCG Review

Key Features

☑ **Project Management**
Secure, role-based access for internal and external deal team members, collaborative access with dashboards to track progress, and integration with Litera Transact for complete transaction management

☑ **Data Room and Document Access**
Complete quick bulk uploads, benefit from instant document deduplication, and integrate with HighQ and Intralinks

☑ **Triage and Organize**
Advanced document classification, document tagging and grouping, and flexible filtering

☑ **Document Review**
Streamline review using GenAI or 1,400+ proprietary AI fields, semantic and Boolean search, natural language queries, comparisons, and more, via an intuitive grid and document viewer

☑ **Flexible Deliverables**
Generate instant AI summaries or redline reports, and export in Word, Excel, and PDFs

☑ **Security & Governance**
Toggle GenAI governance per project and stay compliant with leading standards like SOC 2 Type II, SOC 3, NIS2, ISO 27001, GDPR, DORA, and more.
