

End-to-End Legal Drafting in M365 with AI

Professionals toggle between applications 1,200 times each day, spending up to 4 hours per week simply navigating technology solutions. Litera Draft consolidates the drafting experience, automating repetitive tasks so lawyers can focus on client service and business development.

Litera Draft is a suite of end-to-end, AI-powered legal document drafting tools designed to streamline and automate tasks related to document creation, proofreading and repair, comparisons, metadata cleaning, and document publishing. The suite is available in Word, Outlook, and Web, across PCs and Macs, meeting lawyers wherever they work.

Why Litera Draft?

Litera Draft is your lawyer's all-in-one drafting powerhouse. From AI-powered redlining to clause automation, it transforms Word, Outlook, and the browser into a seamless legal workspace. Say goodbye to tool-switching and hello to faster, smarter, error-free documents that lawyers deliver with confidence and precision.

For IT teams, Litera Draft simplifies your stack and secures your workflows. With unified deployment, flexibility to leverage on-premises or cloud tools, and enterprise-grade security, it reduces overhead, boosts adoption, and aligns perfectly with your cloud strategy. Plus, you can turn AI on or off depending on your policies.

Unify Legal Workflows

Replace fragmented point solutions with a single, intuitive drafting experience that brings together every workflow – from document creation to publishing – in one place. Elevate your experience with Litera's AI Agent – Lito – to further automate drafting tasks.

IT-Friendly, Future Ready

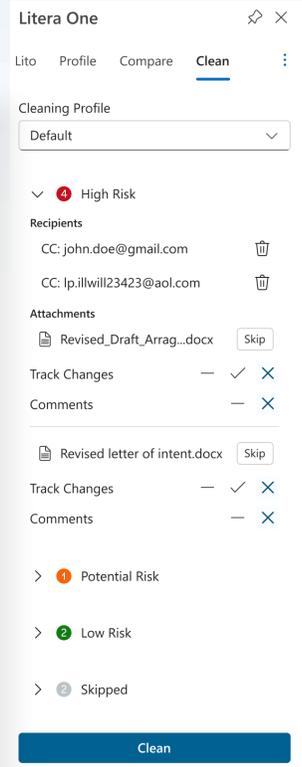

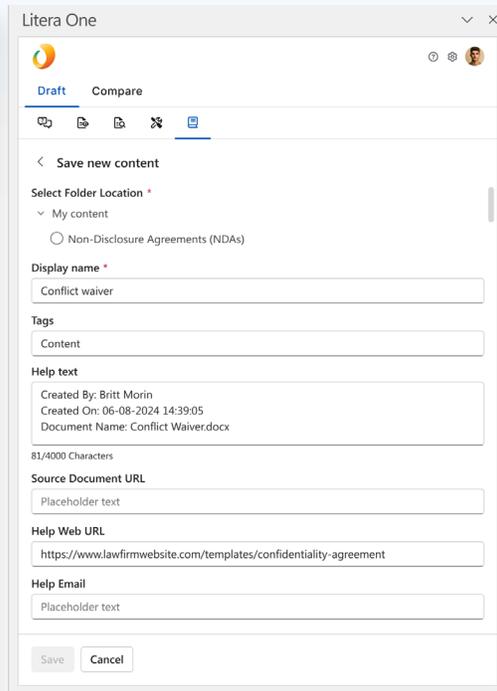

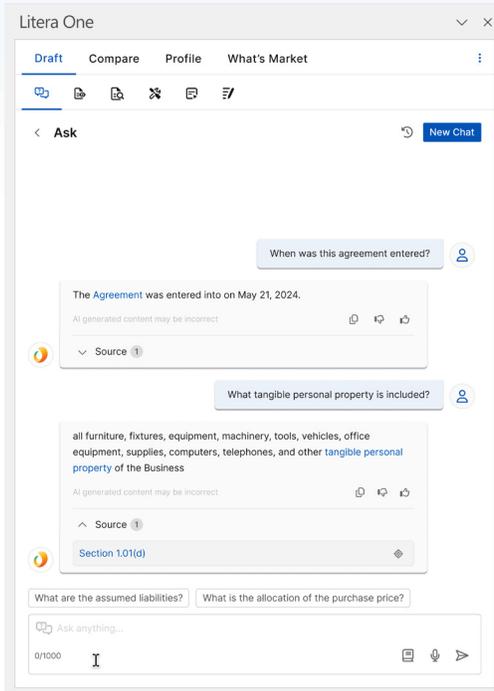

Deploy in the cloud or on-premises, toggle AI on or off, and reduce costs with simplified updates and maintenance.

Work Anywhere Without Disruption

Empower lawyers to work wherever they are – in Word, Outlook, or the browser – across PCs or Macs, delivering AI-powered workflows directly into their native experiences.

"We believe Litera Draft will be the differentiator by giving us the competitive edge to increase efficiency and to better deliver client needs." - **Director of Business Transformation, Am Law 100 Firm**

Key Features

+ Powered by Litera AI+

- ✓ **Document Templates**
Leverage enterprise-approved templates to quickly initiate first drafts.
- ✓ **Content Library**
Save and share language in a content library, anonymizing it for future use. Insert it into your document with one click.
- ✓ **Comparison and Redlining** +
Compare multiple document formats in Word, Outlook, and Web for any scenario – 1:1 or in bulk – and get detailed redlines. Instantly generate AI-powered summaries and share with colleagues or clients.
- ✓ **Proofreading & Formatting** +
Catch up document details with AI. Analyze documents and identify common issues. Apply firm styles and create detailed Tables of Content and Tables of Authority.
- ✓ **Metadata Cleaning**
Clean risky metadata, comments, and track changes from your documents. Securely send encrypted files and messages.
- ✓ **Intuitive PDF Workflows**
Edit and redact PDFs, and quickly create detailed binders and closing files.
