Governance

CAM - Data Protection for Business Continuity and Archiving

Hackers have become increasingly sophisticated, stealing and deleting data to hold it ransom. And organizations might not even now it. It takes an average of 207 days for a cyberbreach to be detected, so protecting your data and having a proven business continuity plan is critical.

Prosperoware CAM is a software-as-a-service (SaaS) platform for adoption and governance across collaboration systems. It enables organizations to protect the data they need and minimize the data they do not, mitigating data chaos and reducing privacy and cybersecurity risks. The CAM Data Protection feature set supports on-premises (iManage server 10.3+) and cloud systems (NetDocuments and iManage Cloud), allowing organizations to set policies to protect data in case of incidents.

Data Protection for Business Continuity and Archival is designed to address (a) the need for organizations to protect data from damaging hacks and ensure cybersecurity and privacy compliance, and (b) provide organizations with rapid document access in case of outages (due to cybersecurity issues, internal server issues, etc.)

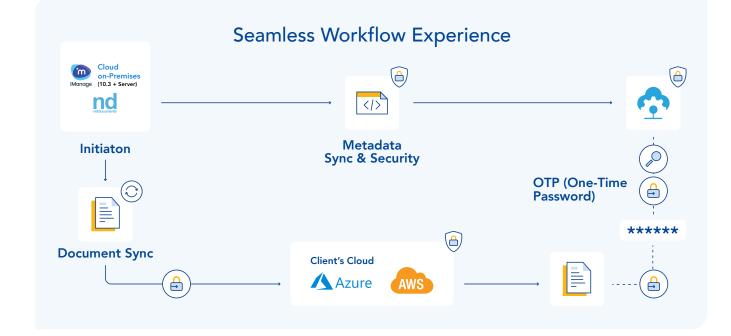

Key Features

- Rapid document access through a one-time password (OTP)
- Sync document metadata and security from onpremises (iManage 10.3+ server or above) to CAM
- Control over security clients store documents in their own AWS or Azure private clouds, with only the metadata and security stored in CAM
- Configurable profile forms to search documents across a set of criteria (clients, matters names, data ranges, or other metadata specifications)
- Effortless profile search and document download in case of outage

Plan for incident responses with CAM Data Protection for Business Continuity & Archival

- Effortless access to important and time-sensitive organization and client work product
- Enables organizations to have tested data protection in place
- Protects sensitive data from malicious hackers by having a copy of all documents
- Less resource and time-draining data protection assurance
- Compliance with increasing cybersecurity and privacy requirements

About Litera

Litera has been a global leader in legal technology for 25+ years, helping legal teams work more efficiently, accurately, and competitively. As a leader in document workflow, collaboration, and data management solutions, we empower legal teams with simplified technology for creating and managing all their documents, deals, cases, and data.
