

Truly know what's in your contracts and documents

Kira is a powerful machine learning software that automatically identifies, extracts, and analyzes concepts and data points of interest from contracts and other documents with unparalleled accuracy and efficiency.

Why Kira?

Streamline contract review processes and analyze more documents in less time, enhance client services, and build your competitive advantage, by leveraging Kira to easily find and use trusted information from your contracts and other documents. Our technology helps enterprises quickly uncover relevant information from their contracts and documents and contextualize this information to support data-driven decision-making.

Accurate Built-in Intelligence

Over 1,400 built-in smart fields (machine learning models) trained by our team of highly experienced lawyers, accountants, and subject matter experts to automatically find and extract clauses and data points of interest.

Quick Study

Easily create custom smart fields in any Latin-script language using our no-code machine learning tool, so Kira can instantly and accurately identify any desired provisions, clauses, data points, and answers to any unique questions you have.

Patented Machine Learning Technology

Artificial intelligence built using state-of-the-art machine learning techniques, awarded with a patent. This enables our in-house subject matter experts to build smart fields with greater efficiency and accuracy compared to manual review or traditional rules-based systems.

Adaptive Workflows

Centralized online platform with data visualization tools. Instantly track progress and view details of aggregated data, such as relative frequency or relationships between critical provisions, clauses, and data points. Use Smart Search, Tags, Document Grouping, and Assign to easily manage contract and document reviews and foster collaboration and transparency across teams.

Additional Features

✓ Start Projects Immediately

Instantly start analyzing contracts and other documents without waiting for installation or other time-consuming processes. Import over 60 file formats via drag-and-drop or importing from your desktop or other apps.

✓ Export in Multiple Formats

Create and export custom summary charts for almost any data point in Word, Excel, or PDF and use exports with other Litera products like Desktop and Transact.

✓ Support

The 24/7 support team behind Kira is unrivaled. Additionally, the Kira Support Portal provides users with access to an extensive repository of self-service articles.

✓ One Kira Platform, Multiple Use Cases

Kira can be deployed for contract intelligence, transactional due diligence, deal terms and knowledge management, real estate, banking and finance, insurance, regulatory compliance, and wherever visibility into contract and document data is critical.

✓ Infrastructure Based on Your Needs

Kira is available in the cloud or on premises, depending on your organization's specific needs.

"I can't remember an M&A deal over the last four years where we haven't used Kira . . . even on the sell-side, where we're selling a client and we're building out disclosure schedules . . . it's been a really groundbreaking technology . . . I can just see the quality of the product and the timeliness it turns around has been really invaluable in our diligence processes."
