

LITERA
Transact

One platform to better manage all your deals

Litera Transact is a transaction management platform that enables legal teams to securely manage all aspects of corporate transactions with dynamic checklists and automated signing management and closing set creation.

Why Litera Transact?

Apply innovation to every stage of the deal lifecycle to enhance productivity, mitigate risk, and provide clients with a seamless and transparent experience. Litera Transact brings flexibility, speed, and certainty to legal transactions by centralizing and simplifying checklists and status reporting, tracking documents, tasks, and versions, and automating the signature management and closing set creation processes.

Dynamic Checklists

Collaborative, customizable checklists enable you to streamline the management of tasks, diligence requests, issues, and transaction documents. Easily set roles and permissions, and instantly identify item status and the responsible party through searches, filters, and status labels.

Automated Signature Management

Assemble—and perfectly format—signature blocks, pages, and packets for all relevant signers, and automatically update tracking as signatures are captured.

Instant Custom Closing Sets

Create closing books in minutes—not days or weeks. The table of contents is automatically generated and can be easily edited to create closing books in the preferred format for each transaction and for specific stakeholders.

Additional Features

✓ Compare document changes in seconds

Compare and save any two versions of Word and PDF files in your checklist, view changes online, and download comparison files in Word or PDF format, all without leaving LITERA Transact.

✓ Update variables with just a few clicks

Easily update variable information, such as closing date, purchase price, and more, by entering the new information just once. LITERA Transact will then autofill the appropriate field on every document within your checklist.

✓ Deal data on demand

Quickly generate reports on actions performed at the organization and deal levels and on detailed user information, providing a comprehensive audit trail and visibility.

✓ Deal cloning for new deals

Avoid the time-consuming re-population of deal information by cloning entire deals—the documents, signer information, signature page formats, and more.

✓ One Transact Platform, Multiple Use Cases

LITERA Transact can be deployed for any type of corporate transaction, including M&A, venture financing, banking and finance, real estate, and restructuring.

“I’ve never experienced this with the transactions that I do: the same day we closed a transaction with LITERA Transact, we were able to send out original closing sets.”
