

AI That Works the Way Lawyers Work

Lawyers jump between emails, documents, research tools, and internal systems all of which slow work, increase errors, and drain focus. Lito is an AI Legal Agent built into Litera One that meets lawyers where they work—in Outlook, the web, and soon Word—reducing context switching and automating routine tasks through a conversational experience. Not just another chatbot or a simple LLM wrapper, Lito is purpose built for the complexity and stakes of legal practice, understanding legal workflows, delivering firm intelligence and context when and where lawyers need it, and driving measurable efficiency.

19% of a lawyer's day is spent looking for information, with a loss of 23 minutes every time a lawyer switches between apps.

Unifying fragmented tasks

Compare, review, research, and analyze without leaving Outlook or Word

Automating repetitive steps

From document comparison with risk mitigation suggests to post-closing timelines, routine tasks are automated to free lawyers' time for high value work

Accelerate real legal work with curated, purpose-built skills designed by legal experts for the way lawyers actually work.

Available Skills *(Baseline Offering) - New skills released on an ongoing basis!*

Skill	Description		
Chat	Omni-present chat interface for prompting Lito and activating skills	NDA Playbook Review	Prompt-based review of NDAs against playbook standards
Analyze in Grid	Extract key information from document sets. Create custom grids, use pre-built templates instantly, or tailor templates to your workflow.	List Open Items	Generates a structured list of outstanding action items.
Review Terms	Smart definition look-up - just click a term to see pop-up definitions and pin them for quick reference.	Run a Form Check	Quickly check form requirements of your document.
Compare AI <i>(requires Compare)</i>	Our market-leading Compare that accelerates document review with AI-powered comparison, summarization, and risk analysis.	Interim-Period Timeline	Extracts and organizes events during the interim period.
		Post-Closing Timeline	Extracts and organizes events post-closing.
		Draft Item 1.01 of 8-K	AI-assisted drafting of SEC disclosure item.
		Legal News Alert	Turn recent legal developments into clear, client-ready alerts in a matter of seconds.

Lito doesn't stop at single tasks—it chains multiple skills together into guided, step-by-step workflows that mirror how lawyers work. Lito guides users through an orchestrated workflow with these multi-step sequences, designed by Litera's legal knowledge engineers.

What's Coming Next

We're also building new skills that tackle some of the legal industry's most pressing needs:

Capital Markets

Streamlining underwriting workflows, automating regulatory filings, and improving deal execution

M&A

Enhancing due diligence capabilities, automating transaction documentation, and accelerating deal analysis

Business Development

Unlocking firm experience data to win more work

Litigation

Developing tools to support various stages of the litigation lifecycle

Compliance

Automating checks against regulations and firm playbooks

Long-Term Vision

Lito represents a fundamental shift in how legal professionals engage with technology. Instead of learning and navigating multiple applications, lawyers will rely on those that deliver their firm intelligence within their workflows.

Over time, Lito will:

- ✓ Feature an expanded skills library across every practice area and workflow lawyers touch
- ✓ Deepen integrations with Litera products and external data sources to create richer, more accurate insights
- ✓ Redefine AI adoption in legal by providing enterprise-grade security and firm-specific context that consumer AI tools cannot match

The long-term vision is simple yet transformative: Lito will become the AI Legal Agent every lawyer uses to automate legal workflows - reducing friction, surfacing knowledge, and accelerating outcomes.
