

86% *of legal professionals find their workplace technology to be overly complex*

Meet Lito: Your AI Legal Agent

Lito turns complexity into clarity
- anchored to trusted firm data,
aligned with governance, and built
to deliver real results inside lawyers'
existing workflows.

Embedded in the Litera One
interface in M365, Lito understands
legal workflows, orchestrates the
right skills based on your intent,
and eliminates context switching
to accelerate decision-making
allowing legal professionals to
deliver faster answers to clients.

matters and deals

Why Lito

One Interface. Every Answer.

Lito is an AI Legal Agent embedded within
Litera One, your legal control center, and
is currently accessible via Outlook and
the web, placing insights at the heart of
your workflow.

Built on Litera One. Powered by Your Data.

By integrating with Litera solutions such
as Insights, Foundation, and Compare, Lito
delivers firm-specific knowledge in real
time to help lawyers draft with confidence,
make faster decisions, and deliver better
client service.

Powerfully Simple. Purposefully Smart.

Acting with purpose, Lito understands
your intent and orchestrates the right tools
to streamline legal workflows—resulting
in faster decisions and more trusted
outcomes.

Designed for Lawyers. Backed by Experience.

Lito is low-friction and grounded in
Litera's 30+ years of legal expertise and
tightly integrated with Microsoft 365. It
seamlessly combines the practice and
business of law like never before.

Core Capabilities as of August 2025

Web

- ✓ **Chat:** Interact with Lito conversationally to get answers and trigger workflows
- ✓ **Review Terms:** Quickly surface and explore hyperlinked legal definitions, including nested terms, with pop-up explanations
- ✓ **Compare:** Run redlines, risk assessments, and deal point comparisons
- ✓ **Experience Search:** Conversationally query matter data to uncover precedents and firm knowledge

- ✓ **Analyze in Grid:** Ask key questions of your documents—whether with ready-to-use templates or custom prompts—and review outputs side by side for faster analysis

Outlook

- ✓ **Compare:** Analyze attachments for differences and risk directly in email
- ✓ **Experience Search:** Surface firm-specific insights without leaving your inbox

Coming soon: Expanded functionality, more skills, as well as integrated workflows directly within Word.

The Lito Advantage

Lito isn't just another LLM wrapper—it's a true AI agent built for legal professionals. Unlike point solutions that focus narrowly on research, workflow automation, or contract review, Lito stands apart by:

- Delivering outcomes where you work, in Outlook, the web, and soon, Word, to minimize context-switching disruptions
- Drawing on the full breadth and depth of the Litera ecosystem in M365 to orchestrate and sequence an unmatched inventory of legal skills through a natural language experience
- Surfacing matter details and legal insights securely while respecting firm governance and permission data

Litera One + Lito Smarter Together

Litera One unifies your firm's tools and data.

Lito activates them—delivering the right data, in the right place, at the right time.

Together, they streamline the way lawyers work—reducing context switching, accelerating turnaround time, and improving decision quality.
