

METADACT IOS: LITERA METADACT + ZERO SYSTEMS

Share Secure & Clean Documents Across iOS Mobile Devices

Share the cleanest, most professional version of a document with iOS mobile devices and remove the risk of sharing sensitive information. Enhance data loss protection, document security, and collaboration across your organization.

What is Metadact iOS?

ZERO Systems is a generative AI company for the enterprise, offering an AI-powered mobile metadata management solution for law firms.

Litera's Metadact Server is a metadata cleaning solution that scrubs metadata, such as track changes, comments, and more, from documents across any device, enhancing data loss protection, document security, and collaboration. The solution is a web service that allows server-side metadata cleaning and exposes APIs to integrate with a range of client applications.

Together, ZERO Systems seamlessly integrates with Litera's Metadact to offer metadata management capabilities via ZERO System's mobile email client, providing additional control over hidden data in files. Metadact iOS enables lawyers using iOS mobile devices to protect themselves against data loss, improve document security, and enhance collaboration on the go.

Safely Clean Documents

Prepare documents for sharing by automatically cleaning metadata and ensuring organizational data is secure.

Clean Documents Across Devices

Empower legal professionals to collaborate and clean documents from wherever they are, across any iOS device.

Total Control

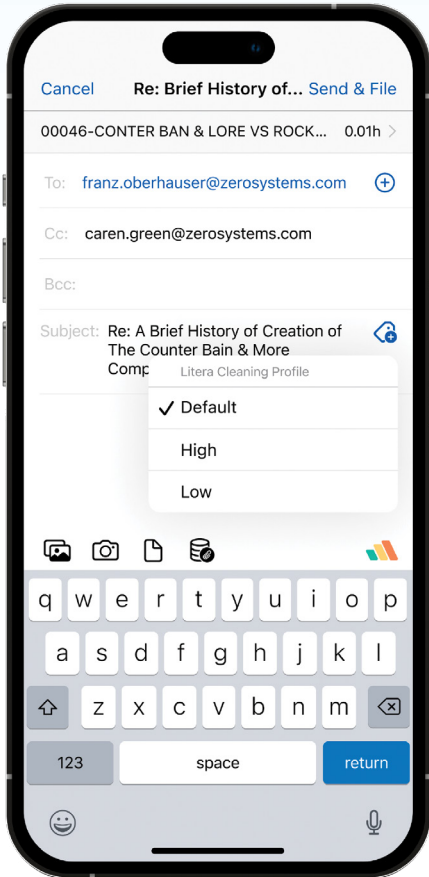

Have total control over data with the ability to customize settings and receive insights, all while maintaining an efficient collaboration workflow.

LITERA
Metadact

Key Features

- ✓ **Prioritization of Emails by Importance**
Automatically prioritize emails based on criteria, such as contact recurrency, reply frequency, subject analysis, etc.
- ✓ **Extra Space for High Priority Emails**
Sort your mailbox by importance so you have extra space for high priority communication.
- ✓ **Automatic Signature Creation**
Automatically find recently used signatures and select the one that fits best. Ensure signatures are consistent across mobile and desktop.
- ✓ **Prevent Data Leaks**
Automatically detect suspicious recipient addresses marked in red to enhance data protection.
- ✓ **Seamless DMS Browsing**
Browse and access your Document Management System directly from the email composing interface. Add hassle-free attachments from wherever you are.
- ✓ **Manage User Access**
Support for protection policies through integration with Intune, MobileIron, WorkspaceOne, and Citrix.

“Through this partnership, we can offer a world-class experience to legal professionals across all their desktop and mobile devices.”

Alex Babin

Co-founder & CEO,
ZERO Systems

“To meet evolving demands of our industry, we are excited by the opportunity to integrate and partner with another leader in LegalTech in ZERO Systems to create a better experience for our shared customers.”

Alan Taylor

Chief Corporate Development Officer, Litera
