

Lito · Legal AI Agent for the Practice and Business of Law

Not Just a Faster Lawyer. A Growing Firm.

Lito is Litera's award-winning Legal AI agent for the practice and business of law. Exact where the work can't be wrong, flexible where lawyers need breadth, and grounded in your own data, so the hours it saves go into the relationships that win work. Included in your Litera subscription, with unlimited usage.

The Shift: Why Today's Efficiency is Tomorrow's Fragility

Most lawyers use AI every week. Few firms can say what it returned. On high-stakes work, probabilistic output still gets re-checked, so the saved hour goes to verification. And when time is genuinely saved, nothing tells the firm how to reinvest it. Efficiency compresses billable hours instead of growing revenue.

74%

of lawyers use AI at least weekly

18%

of firms track any return on their AI investment

\$143B

of legal revenue is under active reconsideration by clients due to AI

Why Litera: One Agent Across Both Sides of the Firm

Litera is the Legal AI platform that best unifies the practice and business of law. Lito is the Legal AI agent that surfaces intelligence so lawyers can practice smarter and grow the business. Rules-based engines proven over 30 years deliver accuracy on high-stakes work, and advanced AI steps in when the work calls for flexibility. A single data layer turns past work into the intelligence that wins the next matter.

"Lito helped me review and compare over 40 leases... what would have taken five hours took 30-45 minutes."

Brian Corbett, Partner, Poyner Spruill LLP

Deterministic engines and lawyer-built skills

Less rechecking on high-stakes work, with output grounded in proven engines and skills built by Litera's in-house lawyers.

Firm AI Search

Surface the right matter, relationship, and credentials in minutes, turning existing relationships into repeatable growth.

Custom workflows with Lito Studio

Your best practices automated and embedded, with no prompt expertise required.

Connect Your Tools Securely

Connect Lito to Litera systems and your own, so the right intelligence arrives at the right moment.

Collaboration with Projects

Brief Lito once, and the whole team works from the same context.

The Right AI for the Job. On Both Sides of the Firm.

One conversational surface with capabilities across the practice and business of law, inside Microsoft 365, Google Workspace, the browser, and iOS. With Lito Inbox, email a pre-configured address and the output comes back to you.

Draft	Practice	Start from the firm's strongest negotiated language, not the nearest match or an AI guess
Review	Practice	Review at any scale with legal-grade accuracy across the whole contract set
Negotiate	Practice	Compare versions, triage redlines, and apply playbooks, built on the most used comparison engine
Grow	Business	Walk into every pitch knowing what the firm has done, who owns the relationship, and what it earned with Firm Search AI, built on Foundation, Litera's experience engine.
Engage	Business	Surface the right client data at the right moment, with a draft ready to send before you even ask with Signals, powered by Postilize
Price	Business	Price from matters the firm actually ran, and see scope drift while the client conversation is still possible
Prove	Business	Draft pitches, proposals, and credentials from the firm's own provable track record
Govern	Business	Deploy firm-wide AI with confidence, not consequences governed connections, firm-level control, auditable throughout
