

The Lito Difference

Imagine being 90%+ more efficient.

Designed by lawyers for lawyers, Lito in Litera One unlocks the full power of Litera's deep legal tech IP and best-in-class tools, like Compare and Foundation Insights, into a single, conversational interface within Outlook, the web, and soon Word. By bringing powerful AI directly into your workflow, Lito automates complex tasks, accelerates document review, and frees lawyers to focus on high-value work - helping your team raise the bar on efficiency, accuracy, and client impact.

Litera Solutions, Supercharged by Lito

Task	Before Lito	After Lito (+ time spent for validation)	Your Time Back for High Value Work*
Document Comparison	Run side-by-side comparisons, manually analyze redlines, and draft summaries (~5-7 minutes)	Automatic AI-powered comparison delivers an instant summary of key differences and risk flags (~30-60 seconds)	5+ hours
Multi-Document Analysis	Receive multiple documents, need to search, review and analyze each for key clauses or data points (~30-45 minutes)	Instantly analyze multiple documents received by email in a clean, interactive grid with a pre-built template — no setup, all documents analyzed at once (~1-2 minutes)	30+ minutes
Review Terms	Look up definitions repeatedly and annotate manually (~30-60 min)	Simply click a term to view smart, contextual definitions and pin key terms for easy reference and navigation between multiple terms (~30-60 seconds)	40+ minutes
Risk Review	Analyze redlines to identify key commercial changes, and advise client on risk level (~5 hours)	AI automatically surfaces and groups changes based on which are material in minutes, right in your workspace. (~2 minutes)	4+ hours

Expanding What's Possible with Lito

Task	Before Lito	After Lito (+ time spent for validation)	Efficiency Gain
Quick Questions	Manually search for answers in documents, precedents, or client notes (~10–30 min per query)	Omni-present chat interface allows you to ask any question at any time, and Lito activates relevant skills instantly (~10–20 seconds)	15+ minutes
NDA Review	Manually check draft NDAs against client playbooks of firm standards (~1–2 hours per NDA)	Automated review of NDAs against your specific client or firm playbook, highlighting compliance or non-compliance of each specific clause (~1–2 minutes)	90+ minutes
Open Items Lists	Review a draft agreement, looking for all square brackets, information still to be populated or confirmed and summarize all outstanding items (~1–2 hours)	Generates structured list of every open item in seconds (~30–60 seconds)	90+ minutes
Form Compliance	Review of disclosure document to ensure compliance with regulation manually (~4 hours)	Lito checks form requirements in seconds (~10 seconds)	3 ½+ hours
Interim Timeline	Review all of the obligations and deliverables in the agreement and compile a list of everything that must be tracked during the period between signing and closing (~2–3 hours)	Automatically extracts and organizes events into a timeline, specifically formatted to be readily shareable (~1–2 minutes)	2+ hours
Post-Closing Timeline	Manually compile a list post-closing events and obligations (~2–3 hours)	Scans agreement to identify post-closing obligations, allowing you to give your client a valuable list of all post-closing activities (~1–2 minutes)	2+ hours
SEC Disclosure	Draft SEC disclosure items manually (~1–2 hours)	AI-assisted drafting (~5–10 minutes)	1+ hour
Client News Updates	Research and summarize legal developments manually (~1–2 hours)	Client-ready alerts in seconds from simply uploading the piece of news, and a preferred format for the client summary (~10–30 seconds)	1+ hour

* Lito is built by lawyers for lawyers. We based the data above on aggregated feedback, experience, and data contributed by practicing legal professionals.

We recommend and suggest that validation of any output generated is important. In Lito, that validation step is built-in intentionally, so you can always review the source and check the underlying contract or document. This is time that you should always take, and we considered it as important to include.
